

SUDIP BOSE, M.D.

Physician | Veteran | Entrepreneur | Educator

www.DocBose.com
www.linkedin.com/in/drsudipbose/

Dr. Sudip Bose has honed his mental toughness as an emergency medicine practitioner in some of the nation's busiest emergency rooms and as a major in the U.S. Army, delivering life-saving treatment to wounded soldiers and Iraqi citizens during the Iraq War. He balances his battle-tested approach with an unwavering empathy for humanity as he cares for patients in their scariest moments. He brings this same sense of urgency and purpose to the business world as he scaffolds replicable, scalable systems and governance frameworks to drive corporate growth and innovation.

Physician Leader: Double board-certified in emergency medicine and EMS. Governance and policy oversight.

Dr. Bose currently serves as EMS medical director in West Texas. He manages city- and county-level emergency response across a 19-county, 38K-mile territory. He concurrently provides direct care as an attending emergency medicine physician at the Odessa Medical Center Hospital and regional critical-access hospitals across the surrounding counties. As a national expert in disaster medicine and mass casualty response, he addressed the United Nations General Assembly following Odessa's 2019 mass shooting. He was recently selected by Congressman August Pfluger to inform policy development and health care access as a member of the Congressional Health Care Advisory Committee.

Public Health Expert & Speaker: 1K+ global and national appearances. Keynote speaker for Fortune 500s.

A strong proponent of translating complex concepts into real-world insights, Dr. Bose captivates audiences with stories that draw on his considerable medical and military expertise and broadly apply to the corporate world. He serves as a spokesperson for the American College of Emergency Physicians. He is an Executive Producer of *Desert Doc*, a 12-episode mini-series released on Amazon Prime in the U.S. and U.K. He has appeared more than one thousand times in national and international media outlets, co-hosted CBS News' weekly "Your Eye on Health" segment, and starred in the medical reality documentary *Untold Stories of the ER* (as broadcast on TLC/Discovery Channel).

Entrepreneur & Founder: Civic leader, trusted advisor, and CEO with year-one profitability for four businesses.

Tireless in his devotion to transforming the nation's healthcare landscape, Dr. Bose acts at both the global and local levels to open access to high-quality, efficient care. He created gold-standard customer experiences as co-owner of two freestanding emergency clinics to counteract the impact of saturated facilities in West Texas. At the national level, he is the founder and CEO of a portfolio of educational technology companies that reached profitability in the first year and provided more than one million clinical leaders with the tools needed to pass certification exams. He also helped start Dr.B (DrB.ai), a venture-backed telehealth platform for which he now serves as medical advisor, and co-founded liveClinic.com, a medical technology platform launched in 155 countries.

Combat Veteran: Decorated frontline U.S. Army physician in Baghdad, Bronze Star recipient, and CNN Hero.

Dr. Bose gained invaluable skills in managing crises and extracting creative solutions from limited resources as a frontline emergency care provider during the peak of insurgencies in the streets of Iraq and at the 31st Combat Support Hospital in Baghdad and Darnall Army Medical Center in Texas. He earned the Bronze Star for serving one of the longest combat tours by a physician since World War II and was hand-selected to treat Saddam Hussein following his capture in 2003.

He complements his deep expertise in the trenches of high-intensity crisis situations with a strategic mindset that both honors the unique circumstances of every challenge and shapes practical solutions that leverage evidence-based best practices. Attuned to the delicate balance between striving for operational excellence and driving financial performance and profitability, Dr. Bose is well-equipped to influence corporate strategy and governance to create value for shareholders, investors, and customers while opening doors to new market opportunities.

Dr. Bose is dedicated to developing the next generation of emergency medicine practitioners and is currently a clinical professor at both Texas Tech University and the University of Illinois. He earned his M.D. from Northwestern University at 25 after obtaining his bachelor's in biology and psychology at the same institution.
